# PocketSmart AI

## Epic 1: Gemini AI Initialization

**Objective:** Initialize the Generative AI system and prepare PocketSmart AI for AI-powered recommendations.

### Files and Folders

Project structure

```
PocketSmart-AI/
■■■ .env.example
■■■ requirements.txt
■■■ app/
    ■■■ services/
        ■■■ __init__.py
        ■■■ gemini_service.py
        ■■■ recommendation_service.py
```

### Files Completed

- .env.example — Environment and Gemini API configuration.
- requirements.txt — Required Python packages including google-genai.
- app/services/__init__.py — Services package initialization.
- app/services/gemini_service.py — Gemini client, prompts, JSON processing, multimodal image input, validation and fallback handling.
- app/services/recommendation_service.py — Fallback recommendations, budget allocation, estimated costs and platform search links.

### Epic 1 Deliverable

Gemini AI initialization and recommendation generation system.
