PocketSmart AI

Epic 3: Backend – FastAPI Integration

Objective: Integrate PocketSmart AI services into a FastAPI backend and expose the required API endpoints.

Files and Folders

Project structure

```
PocketSmart-AI/
■■■ app/
    ■■■ main.py
    ■■■ config.py
    ■■■ database.py
    ■■■ models.py
    ■■■ schemas.py
    ■■■ auth.py
    ■■■ dependencies.py
    ■■■ routers/
        ■■■ __init__.py
        ■■■ auth.py
        ■■■ history.py
        ■■■ pages.py
        ■■■ planners.py
```

app/main.py

- FastAPI application initialization
- Database table creation
- CORS configuration
- Static file mounting
- Router registration
- Health endpoint
- Startup endpoint

API Endpoints

- POST /register
- POST /login
- POST /logout
- GET /session-info
- GET /session-data
- POST /generate-home
- POST /generate-party
- POST /generate-jewelry
- GET /recommendations-details
- GET /history
- GET /
- GET /health
- GET /startup

Page Routing

- app/routers/pages.py
- /
- /login
- /register
- /dashboard
- /planner/home
- /planner/party
- /planner/jewelry
- /history
- /testimonials

API Documentation

FastAPI automatically provides /docs and /redoc for API documentation.

Epic 3 Deliverable

Fully integrated FastAPI backend with authentication, planner APIs, database integration, page routing and API documentation.
